Everything You Wanted To Know About 911!

A **free** 30 minute presentation designed to enhance our interaction with nursing homes, adult family homes, and assisted living facilities. I'll come to you!

This interactive Power Point presentation will cover the following:

1. What kinds of things you should call 911 for
2. Who responds, and how their training differs
3. The difference between aid cars, medic units, and ambulances
4. Paperwork we would need on our arrival
5. What we **really** need from you in the 1st few minutes
6. The forms and content that would be the **ideal** way to organize the paperwork for each of your clients

You will be contacted in the near future to schedule this training, or feel free to contact me instead. Once you've attended, we'll be a great team!

Don Warner Firefighter/Paramedic
